

SPECIFICATIONS:

ANTI-THEFT DEVICE: Shall be adaptable to all types of grill pedestals. The device shall be designed to allow the grill unit unrestrained 360 degree rotation for proper draft control while also preventing removal by normal means.

LOCKING PIN: Shall be of special hardened alloy steel and shall not be readily visible to the user. The lock pin shall be secured by means of a blind hole.

INSTALLATION INSTRUCTIONS: (Permanent Model)

1. Dig the hole for the footing as shown.
2. Place the pedestal in the footing hole and block up plumb and level to the dimensions as shown on the drawings.
3. Pour the concrete and allow to harden 24 to 48 hours.
4. With the help of a second person, place the tab on the underside of the grill unit through the hole in the top plate of the pedestal and have that person raise the grill so that the hole in the tab is in line with the hole in the pedestal pipe.
5. Now drive the lock pin into the hole in the tab until the pin is fully inside of the pipe.
6. Lower the grill unit onto the pedestal and check to be sure that the grill rotates freely.
